SEAG 2026 Final 8-Week Revision Plan

A calm, practical week-by-week plan to strengthen English, Maths, timing and confidence before test day.

PAPER 1	PAPER 2
Saturday 14 November 2026	Saturday 21 November 2026

Prepared by **Taiwo Oloyede**

OTA Learning Studio | Guided learning. Lasting progress.

Use this guide as a flexible structure, not a pressure schedule. Adjust the workload to your child's needs, school commitments and wellbeing.

START HERE

A strong eight weeks begins with clarity.

The goal is not to make your child complete the greatest number of questions. It is to find the patterns behind lost marks, teach the missing skill and practise until the better method becomes familiar.

1. Diagnose

Use a mixed English and Maths task. Record the reason for each error, not only the score.

2. Prioritise

Choose the three weaknesses costing the most marks. These become the main revision targets.

3. Practise

Use short, focused sessions. Include correction time so mistakes become useful evidence.

4. Review

At the end of each week, note what improved, what remains difficult and what to change next.

Your baseline snapshot

Complete this before Week 1. It will make the rest of the plan much more focused.

English comprehension	1 2 3 4 5	
Vocabulary, grammar and spelling	1 2 3 4 5	
Number, fractions and percentages	1 2 3 4 5	
Problem-solving and reasoning	1 2 3 4 5	
Timing and answer-sheet accuracy	1 2 3 4 5	

WEEKS 1-4

Repair the foundations first.

Keep sessions short enough for your child to stay attentive. A useful session ends with an understood correction, not exhaustion.

WEEK 1	Find the gaps
Focus	Use a mixed diagnostic task and build a mistake list.
Actions	- English: comprehension, inference, vocabulary, grammar, spelling and punctuation. - Maths: number, fractions, decimals, percentages, measures, shape, money, data and reasoning.
Parent check	Write why each answer was wrong: knowledge gap, technique error or careless error.

WEEK 2	Strengthen core Maths
Focus	Prioritise accurate methods before speed.
Actions	- Re-teach the two weakest number topics. - Add short word problems and ask: What do I know? What must I find? Which operation fits?
Parent check	Aim for 3 focused Maths sessions, each followed by correction.

WEEK 3	Build stronger English
Focus	Slow the reading down before trying to speed it up.
Actions	- Practise retrieval, inference, vocabulary in context and evidence selection. - Require a return to the passage: answers should come from the text, not memory.
Parent check	Keep a vocabulary bank with meaning, synonym and one original sentence.

WEEK 4	Mix English and Maths
Focus	Train the mental switch between subjects.
Actions	- Try 20 minutes English + 20 minutes Maths + 10 minutes correcting. - Circle recurring errors. A repeated 'careless mistake' is now a revision target.
Parent check	Complete one mixed session under gentle time pressure.

WEEKS 5-8

Move from practice to performance.

The final month is about applying known skills accurately under realistic conditions, then using the evidence to make precise adjustments.

WEEK 5	Introduce serious timed practice
Focus	Improve decisions under time pressure, not frantic rushing.
Actions	• Practise leaving a difficult question and returning later. • Reserve checking time and rehearse accurate answer-sheet transfer.
Parent check	Notice whether time is lost through reading, method choice, calculations or hesitation.
WEEK 6	Complete a full practice paper
Focus	Recreate test conditions and analyse the result properly.
Actions	• No help, interruptions or stopped clock during the paper. • Review every error and label it: knowledge, technique or careless.
Parent check	Spend at least as much time reviewing as completing the paper.
WEEK 7	Target the three biggest weaknesses
Focus	Do not restart the whole curriculum.
Actions	• Use evidence from Weeks 1-6 to choose three priorities. • Keep some mixed practice while concentrating most time on those weaknesses.
Parent check	Check that scores are improving because errors are changing, not because questions are familiar.
WEEK 8	Sharpen technique and protect confidence
Focus	Reduce volume; keep skills active and routines calm.
Actions	• Use short mixed tasks, light review and early nights. • Rehearse moving on, checking calmly and recovering after a difficult question.
Parent check	Do not suddenly double revision hours. Confidence and rest matter now.

YOUR WEEKLY ROUTINE

A repeatable plan beats random revision.

Choose realistic session lengths. For many pupils, 35-50 focused minutes is more productive than a long unfocused evening.

Monday	Weak Maths topic	■	
Tuesday	English comprehension + vocabulary	■	
Wednesday	Mixed English and Maths	■	
Thursday	Maths problem-solving	■	
Friday	Light review or rest	■	
Weekend	Timed practice + corrections	■	

The 10-minute correction rule

At the end of every session, spend at least 10 minutes correcting. Ask your child to explain the correct method aloud. If they cannot explain it simply, the correction is not complete.

Keep

One method or habit that worked well this week.

Change

One recurring error to address next week.

MISTAKE TRACKER

Turn every error into a next step.

Use one row per useful mistake. The final column matters most: it records what your child will do differently next time.

		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		
		Knowledge / Technique / Careless		

WEEKLY PROGRESS

Look for movement, not perfection.

Complete one row every weekend. A small, steady improvement is evidence that the plan is working.

1	_____ %	_____ %	On time / over		
2	_____ %	_____ %	On time / over		
3	_____ %	_____ %	On time / over		
4	_____ %	_____ %	On time / over		
5	_____ %	_____ %	On time / over		
6	_____ %	_____ %	On time / over		
7	_____ %	_____ %	On time / over		
8	_____ %	_____ %	On time / over		

Three questions for the weekly review

What improved?

Name a specific skill, habit or question type.

What repeated?

Identify the error pattern that still needs teaching.

What changes next week?

Choose one practical adjustment: a topic, a method, a shorter session, more correction or a timed task.

EXAM-WEEK CHECKLIST

Protect calm, routine and confidence.

The final days are not the time to prove how much work has been done. They are the time to help your child arrive rested, organised and ready to think clearly.

- Confirm the assessment centre and travel plan.

- Check arrival instructions and required items.

- Use short review sessions only.

- Finish full-paper practice early enough to recover.

- Prepare clothing and materials the night before.

- Keep bedtime and breakfast familiar.

- Avoid discussing scores immediately before the paper.

- Remind your child to move on from a stubborn question.

- After Paper 1, praise effort and reset for Paper 2.

- Keep adult anxiety away from the child.

A useful sentence to rehearse

If one question feels difficult, I can stay calm, make a sensible choice and move on. One question does not decide my whole paper.

Parent note

Your child does not need to feel perfectly confident. They need a familiar routine, practical strategies and the reassurance that they can recover when something feels hard.

WHEN YOU WANT A CLEARER PLAN

Focused support for your child's actual gaps.

OTA Learning Studio provides personalised online SEAG English and Maths tutoring for P7 pupils. Lessons can focus on comprehension, vocabulary, grammar, number skills, reasoning, timed practice and exam technique.

Free parent consultation

Tell us what is currently difficult. We will discuss the learner's needs and the most useful next step.

One-to-one online lessons

Focused teaching, practice and feedback built around one learner rather than a generic worksheet sequence.
